

Quick Start Guide

ECOS SECURE BOOT STICK [SX]

1. Connect ECOS SECURE BOOT STICK to your PC or Mac.
3. Boot your computer. The computer must be set to USB boot in the BIOS. Alternatively, select ECOS SECURE BOOT STICK as temporary boot device.
4. As soon as the stick flashes during the boot procedure, enter the PIN code **1357** of the smart card on the stick's keyboard and confirm it with the ✓-key.
5. The boot menu will briefly pop up. ECOS SECURE BOOT STICK will then loaded automatically without requiring any user intervention.

5. If your computer is LAN-connected, your stick will use it for internet connection. WLAN or LTE are also available through the network icon at the bottom right of the taskbar.
6. After the stick has booted, select your target system (ECOS Demo Server Citrix or ECOS Demo Server RDP) and log in with your username and password.

User name: **demo**

Password: **demo**

You are now in the ECOS Demo Environment where you will find various standard applications.

A detailed user documentation as well as helpful information on how to prepare your computer is available here:
